

Can Writing Articles Actually Teach You to Write?

By: Giovanni Maria Tommaso

1. Writing articles will improve all other types of writings you may do.
2. Getting started may be the hurdle that is the hardest part to do.
3. Once the first article is written each article thereafter becomes easier.

Writing an article can improve any type of writing you may do. Do you like to write stories or novels, fiction or fantasy? Do you like writing poetry, plays, and scripts? Well, writing articles will give you the much-needed practice to polish up anything that you do that concerns writing, even the writing of business or personal letters becomes easier and more creative.

Getting started for you may be the hurdle that is the hardest part; however, once you write an article you will find that each article becomes easier and more enjoyable to accomplish. For me, it was not the getting started; it just never occurred to me that I could write an article, much less, be it understood, enjoyed, or interesting.

Chris, my web designer, and I give him all the credit because he first planted the seed within me that has taken shape, suggested that I write articles by joining an article submission website. I did, EzineArticles.com, and the rest is history. I love it for the sheer joy it brings.

My overall writing has improved, as well as my thought processes of organization and structure. The facilitating of clarity as related to my subjects has become purer and of a more transparent quality. This has been beneficial in all of my writings but especially my poetry, which I consider at this time my true art's desiring.

Fantasy = is a genre of fiction;
